

AWS Certified Data Professional with 2 years of experience building scalable analytics solutions using SQL, Python, Snowflake, and Power BI. Proven track record of automating reporting, designing data pipelines, and delivering actionable business insights through data analysis and stakeholder collaboration.

WORK EXPERIENCE

Operations Data Analyst

Bank Of London

Jun 2025 - Mar 2026

London, United Kingdom

- Tech:** SQL, Python, Power BI, Excel, Snowflake
- Drove the integration of Payments, Transaction Monitoring, and CRM data** into Snowflake by defining business rules with the engineering team and implementing a Medallion architecture to improve data quality.
 - Reduced reporting turnaround time by 80%** by transforming manual Excel based reporting into automated Power BI dashboards, enabling near real time insights for decision-making.
 - Led enterprise data governance and analytics strategy** by defining data standards, access controls and cross-functional workflows across compliance, product and operations teams.
 - Analyzed 10M+ transaction and CRM records** to identify systemic data quality issues and implemented remediation strategies, significantly improving data reliability across operational systems.
 - Engaged with senior stakeholders**, engineering and business teams to align reporting and analytics with strategic goals.

Data Analyst

Crossworld AG

Apr 2024 - May 2025

Brienz, Switzerland (Remote)

- Tech:** SQL, Python, Power BI, Excel, AWS
- Performed cohort and segmentation analysis** to uncover behavioral drivers of engagement, contributing to an **18% increase in customer retention** through targeted lifecycle strategies.
 - Developed predictive models for demand forecasting and churn prediction**, enabling data-driven marketing and operational planning.
 - Designed and deployed automated Power BI dashboards**, delivering real time executive insights and eliminating repetitive manual reporting workflows.

Digital Engineering Intern

Ernst & Young

Jan 2024 - Mar 2024

Belfast, United Kingdom

- Tech:** SQL, Python, Azure, Django, React
- Built data ingestion pipeline (REST framework)** using Django and React, enabling seamless ingestion of data from third party applications.
 - Modeled data (STAR schema)** for a CRM application of a Motor Parts logistics company to support enhanced performance tracking and scalable data architecture.
 - Gained hands-on experience with **Azure cloud** and **DevOps practices** through rigorous client simulations.

EDUCATION

Master of Science in Business Analytics

Queen's University Belfast

Sep 2022 - Dec 2023

PG Certificate Programme in Business Management

MICA, Ahmedabad

Jun 2021 - May 2022

Bachelor of Technology in Computer Engineering

University of Mumbai

Jul 2016 - Dec 2020

TECHNICAL SKILLS

Languages	Python (Pandas, NumPy, PySpark), SQL (Joins, CTEs, Views)
Visualization & Reporting	Power BI, Tableau, Excel
ML & Analytics	Predictive Modeling, Statistical Analysis, Hypothesis Testing, A/B Testing, Feature Engineering
Cloud Services	AWS (S3, EC2, EMR, DynamoDB, RedShift, Glue, Lambda), Snowflake
DevOps	dbt, Databricks, Airflow, Git

PROJECTS

- Consumer Choice Modeling using Conjoint Analysis**
- Performed **Conjoint Analysis** and **Principal Component Analysis (PCA)** to identify key factors influencing **laptop purchase decisions**.
 - Optimized **576 product profiles to 20** using **fractional factorial design**, evaluating **Brand, Hard Drive, RAM, Screen Size, and Price**.
 - Conducted **market simulation**, identifying **RAM (25%)** and **Screen Size (25.85%)** as the most influential attributes, with **Apple achieving 37% market preference**.

- Interactive Coffee Sales Dashboard in Excel**
- Built an **interactive Coffee Sales Dashboard in Excel** to analyze **50,000 sales transactions** and identify sales trends.
 - Leveraged **Pivot Tables, Pivot Charts, Slicers, Timelines, XLOOKUP, and INDEX MATCH** for dynamic analysis and efficient data retrieval.
 - Delivered actionable insights into **sales performance, top customers, and regional trends** through interactive visualizations.

- NLP-Based Twitter Sentiment & Engagement Prediction**
- Performed **sentiment analysis** and **engagement prediction** on **40,000 tweets** using **NLP techniques** with **VADER** and **TextBlob**.
 - Developed predictive models using **Random Forest (72.61% accuracy)**, **Linear Regression**, and **Naïve Bayes** to forecast tweet likes.
 - Classified tweets into **positive, neutral, and negative** sentiments, identifying **controversial and patriotic content** as the highest-engagement category.

CERTIFICATIONS

AWS Certified: Data Engineer Associate	Mar 2026 - Mar 2029
Google Advanced Data Analytics Certificate	Jan 2025
Microsoft Certified: Azure Fundamentals	Oct 2024
PMI Certified: Project Management Ready	Nov 2024
